

Ballerina

Cloud Native Programming Language

Ballerina makes it easy to create resilient services that integrate and orchestrate transactions across distributed endpoints.

BALLERINA KNOWS... TABLES AND STREAMS

```
endpoint sql:Client db { ... };  
table x = check Db -> select( "SELECT * FROM TABLE");  
json converted = check <json>x;  
  
// In-memory topic, mappable to endpoints  
stream<data_type> y = {};  
y.publish();  
y.receive();
```
